

# Dementia in Maine

## Characteristics, Care, and Cost **Across Settings\***

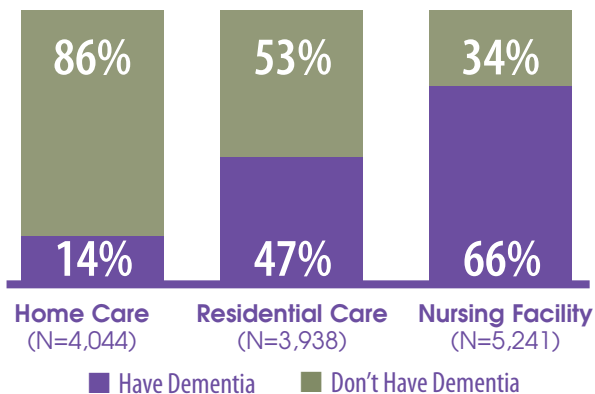

- ◆ Nursing Facilities
- ◆ Residential Care Facilities
- ◆ Home

Number and percentage of people in Maine's Long Term Care System Who Have Dementia (N=13,223)

Almost half the people receiving community and facility-based long term services and supports have dementia.

### Dementia Diagnosis by Setting

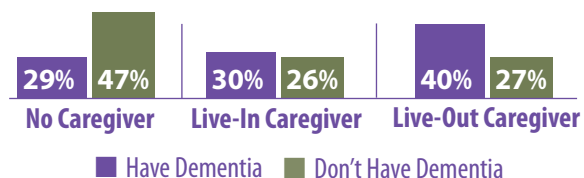

As the disease progresses, so does the need for greater supervision, more help with activities of daily living, and eventually help with palliative and end of life care. The proportion of people with dementia increases with each higher level of care.

### Average age of people with dementia by setting

	Home Care	Residential Care	Nursing Facility
Have Dementia	79	83	84
Do Not Have Dementia	64	79	77

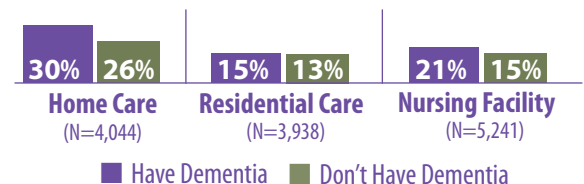

### Caregiver status by dementia diagnosis in the home care setting

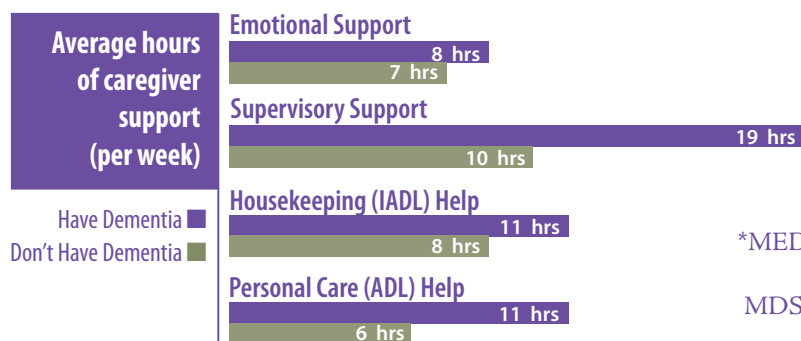

### Living status

### Number of people with one or more falls in the past 30 days:

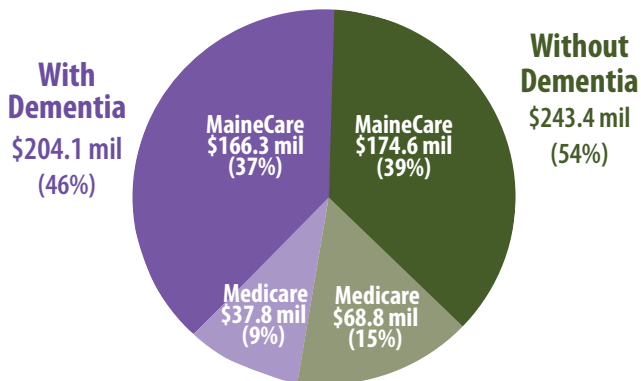

### Average hours of caregiver support (per week)

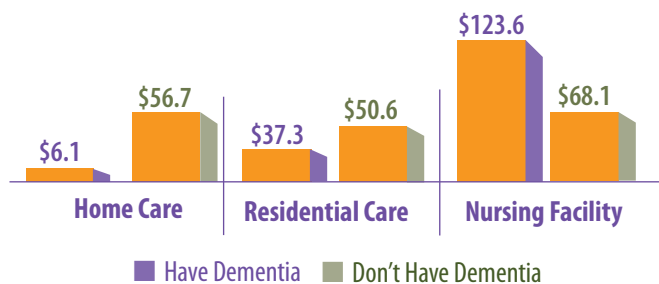

\*MED assessment data for persons using MaineCare or state-funded home care services at any time during SFY 2010, and MDS or MDS-RC assessment data for all residential care and nursing facility residents listed on facility rosters as of March 15, 2010

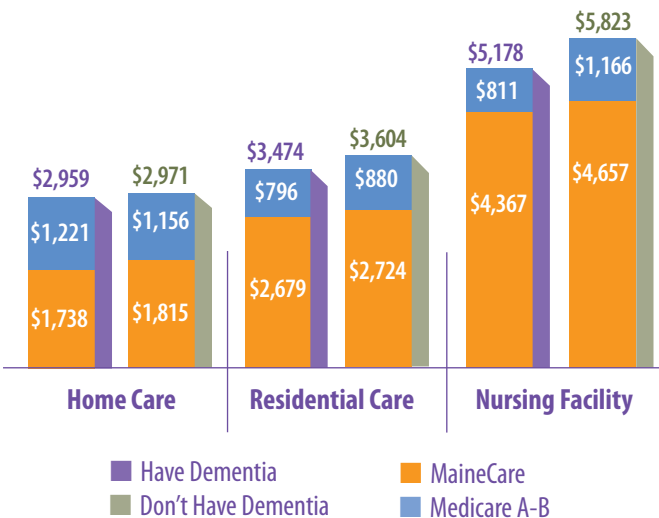

## Total MaineCare and Medicare Payments for MaineCare Members (SFY 2010)

### MaineCare payments for people with dementia are concentrated in the nursing facility

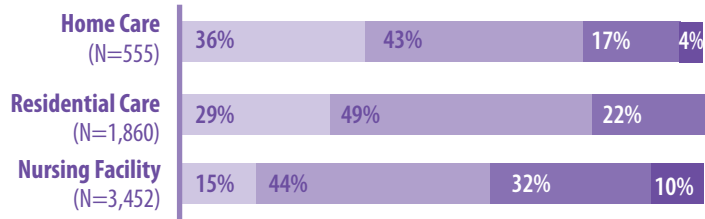

### Average Per Person Per Month Medicare and Medicaid Payments

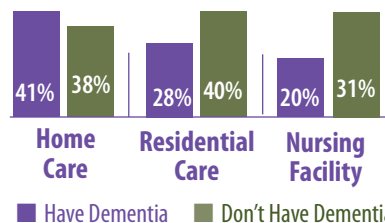

## Cognitive Performance Scale (CPS)

- CPS 0-2: Intact to mild impairment
- CPS 3: Moderate impairment
- CPS 4-5: Moderate/severe to severe impairment
- CPS 6: Severe Impairment

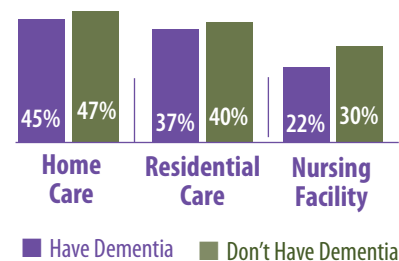

### People with Dementia

### Hospitalizations: The percentage of members with one or more hospitalizations

### ER Visits: The number of members with at least one ER visit

**SOURCES:** To identify members by setting, we used MED assessment data for persons using MaineCare-funded home care services at any time during SFY 2010, and MDS or MDS-RCA assessment data for all MaineCare residential care and nursing facility residents listed on facility rosters as of March 15, 2010. We then used JEN Associates' Integrated Medical Management Research System (iMMRS®) to link members to MaineCare and Medicare claims data.
